

COST OF ATTENDANCE

Direct charges for tuition and fee rates are set on an annual basis by the Board of Trustees. Variable expenses such as books, transportation and personal living expenses are set by the Office of Financial Aid and are based on average student expenses and federal guidelines.

The Office of Financial Aid establishes the annual student expense budget which represents the maximum amount of financial aid a student may receive over a standard academic year (fall/spring/summer). Included in the student expense budget are commonly accepted educational expense allowances for items such as tuition, fees, books, transportation, and personal spending in accordance with federal regulations.

These annual student expense budgets reflect average cost of attendance figures. If you register for more than the budgeted amount or if your projected personal expenses are higher than our estimate, you are encouraged to contact the Office of Financial Aid to discuss your needs and the possibility of increasing your individual personal expense allowance.
